

AOL Homepage Pushdown + 300x250 Banner

Description:	The Pushdown provides advertisers with the opportunity to own a unique above-the-fold, host-initiated execution. The Pushdown expands down and displaces content for a brief period upon page load. The difference between a Pushdown and a traditional expandable is that the content itself is displaced, not overlaid, with the advertising unit. The Pushdown unit is 970x66 on AOL.com. Both units have a host-initiated expand on first impression, with each subsequent impression expandable on user click. The pushdown is sold in combination with a 300x250 banner.
